Justin,

GW and VI? That doesn't sound like something Removal usually gets involved with.

Jake

Hi Jake,

The status for this site (known as Libbey Owens Ford Plant in SEMS) is "Referred to Removal – No Further Remedial Assessment." This status means that, for the purposes of Site Assessment, the site is closed; however, it suggests that Removal investigates the site. The status was changed in 2012 based on the results of the 2011 SI. As far as I can tell, Removal has not performed any activities at the site. I will meet with their program to verify this and see whether they can take the lead on the site. When I have more information I will be in touch.

Thanks,

Justin Bleiler

Justin,

We had a FOIA for this site today and the latest document I could find was Triad SI 2011. They recommended Further GW and VI investigations. Do you have any info on whether those recommendations were followed up on. It is not in the VRP.

Thanks
